

FUEL SURCHARGE UPDATE

March 17, 2026

In response to recent fluctuations in jet fuel costs, Korean Air will be revising its fuel surcharge for air waybills issued in the **U.S.A.** from USD 1.10/kg to **USD 1.30/kg**

This fuel surcharge increase will be **effective as of April 1, 2026.**

FUEL SURCHARGE GUIDELINES:

- Calculation based on **CHARGEABLE WEIGHT**, including minimum charge shipments
- Based on **KE FLIGHT DATE**, not AWB issuance date
- The fuel surcharge code MYC and corresponding amounts will be included in the appropriate "Other Charges" & "Due Carrier" fields of the AWB

Korean Air will continue to monitor jet fuel costs closely and make adjustments as necessary. We appreciate your understanding, ongoing support, and cooperation.

Sincerely,

IAN (IL WOO) KIM
Head of Cargo, Regional HQ, Americas
Korean Air
